LUZ DE PROYECTO

ES La luz como parte integrante e integradora de un espacio, así concebimos Luz de proyectos, como un encuentro entre la luz y la materia que lo envuelve para permitir el desarrollo de la vida en ese espacio que a su vez es entendido como un todo.

Las formas redondeadas y las líneas rectas equilibran esta colección en la que la luz cumple la forma que la transporta para transmitir el carácter de las cosas de manera inmediata. La luz dinamiza el espacio real y lo transforma en espacio potencial, siendo la puerta de acceso para la creación de experiencias en un espacio que previamente era solo un proyecto.

EN *Light as an integral and integrating part of a space, this is the concept behind Project Light, as an encounter between the light and the matter that surrounds it to allow the development of life in that space, which in turn is understood as a whole.*

Rounded shapes and straight lines balance this collection where light fulfils the form to transmit the character of things. Light energizes the real space and transforms it into potential space, becoming the gateway to the creation of experiences in a space that was previously only a project.

PT A luz como parte integrante de um espaço, concebemos assim Luz de Projectos, como um encontro entre a luz e a matéria que a rodeia para permitir o desenvolvimento da vida naquele espaço que por sua vez é entendido como um todo.

Formas arredondadas e linhas retas equilibram esta coleção em que a luz encontra a forma que a transporta para transmitir o caráter das coisas imediatamente. A luz revigora o espaço real e transforma-o em espaço potencial, sendo a porta de acesso para a criação de experiências num espaço que antes era apenas um projeto.

FR La lumière comme partie intégrante et intégratrice d'un espace; c'est ainsi que nous concevons Luz de proyectos, comme une rencontre entre la lumière et la matière qui l'entoure pour permettre de vivre dans cet espace qui à son tour est compris comme un tout.

Les formes arrondies et les lignes droites équilibrent cette collection dans laquelle la lumière rencontre la forme qui la transporte pour transmettre immédiatement le caractère des choses. La lumière dynamise l'espace réel et le transforme en espace potentiel, étant la porte d'accès pour la création d'expériences dans un espace qui n'était auparavant qu'un projet.

UNA VIDA DE LUZ

ES La evolución consiste en una serie de transformaciones continuas que va experimentando la naturaleza y los seres que la componen. Esto es precisamente lo que Carlos y Regina Schuller, fundadores de SÛLION, han ido haciendo a lo largo de estos últimos 50 años, adaptándose a los continuos cambios, pero siempre con un mismo objetivo: crear espacios únicos que destilen personalidad.

La luz de SÛLION se enciende en 1966, cuando Carlos y Regina abren su primer taller de ensamblado de lámparas en Madrid, al que llamaron "Lámparas Schuller" y que, poco a poco, fue creciendo hasta convertirse en un referente en el diseño y la confección de lámparas artesanales. Por sus manos han pasado las últimas tendencias en iluminación decorativa de los años 80 y 90, desde farolitos, hasta sus tan exitosas lámparas florentinas y Tiffanys, que exportaron al resto de países de Europa, y también a Asia, África y Latinoamérica.

El estilo aplicado en cada diseño y el cuidado en la elección de sus materiales puestos al servicio de la luz, junto con el tesón y el esfuerzo de la familia Schuller, han llevado a SÛLION a convertirse en lo que es hoy en día.

EN Evolution is made of a bunch of continuous changes in the nature and its living beings. This is exactly what Carlos and Regina Schuller, founders of SÛLION, have been doing these last 50 years, adapting to the continuous changes, but always with the same target: create unique spaces with strong personality.

The light of SÛLION was turned on in 1966, when Carlos and Regina Schuller opened their first workshop of lamps assembly in Madrid, they named it "Lámparas Schuller", and step by step started growing until it was leader in design and assembly of handmade lamps. By their hands last trends have passed of the years 80 and 90, from small lamps to successful Florentine lamps and Tiffanys, which they exported to other countries of Europe, and to Asia, Africa and Latin America.

The style applied in each design and the careful selection of the materials used for the lights, allied with the hard work and the effort of the Schuller family, have transformed SÛLION in what it is nowadays.

PT A evolução consiste em uma série de transformações contínuas pelas quais passam a natureza e os seres que a compõem. É precisamente isso que Carlos e Regina Schuller, fundadores do SÛLION, têm feito nos últimos 50 anos, adaptando-se a mudanças contínuas, mas sempre com o mesmo objetivo: criar espaços únicos que exalem personalidade.

A luz SÛLION foi acesa em 1966, quando Carlos e Regina abriram em Madrid a sua primeira oficina de montagem de lâmpadas, que chamaram de "Lâmpadas Schuller" e que, aos poucos, foi se tornando uma referência em design e fabricação de lâmpadas feitas à mão. As últimas tendências em iluminação decorativa dos anos 80 e 90 passaram por suas mãos, desde as lanternas até as luminárias Florentinas e Tiffany de grande sucesso, que exportou para outros países europeus, além da Ásia, África e América Latina.

O estilo aplicado em cada desenho e o cuidado na escolha dos materiais a serviço da luz, aliados à tenacidade e esforço da família Schuller, fizeram com que a SÛLION se tornasse o que é hoje.

FR L'évolution consiste en une série de transformations continues que subissent la nature et les êtres qui la composent. C'est précisément ce qu'ont fait Carlos et Regina Schuller, fondateurs de SÛLION, au cours des 50 dernières années, en s'adaptant aux changements continus, mais toujours avec le même objectif: créer des espaces uniques qui respirent la personnalité.

La lumière de SÛLION a été allumée en 1966, lorsque Carlos et Regina ont ouvert leur premier atelier d'assemblage de lampes à Madrid, atelier qu'ils ont appelé «Lámparas Schuller» et qui, petit à petit, est devenu une référence dans la conception et la fabrication de lampes artisanales. Les dernières tendances de l'éclairage décoratif des années 80 et 90 sont passées entre ses mains, tant pour les lustres, comme pour les lampes florentines et Tiffany à succès, qu'il a exportées dans d'autres pays européens, ainsi qu'en Asie, en Afrique et en Amérique latine.

Le style appliqué dans chaque conception et le soin dans le choix des matériaux au service de la lumière, ainsi que la ténacité et l'effort de la famille Schuller, ont conduit SÛLION à devenir ce qu'elle est aujourd'hui.

A photograph of a wooden floor with a white curved wall and recessed lighting. The floor is made of dark wood with a prominent grain pattern. The wall is white and has a curved top edge. There are two recessed lighting fixtures in the wall, one on the left and one on the right, which cast a warm glow on the floor. The name 'MARTÍN' is written in white, bold, uppercase letters across the middle of the image.
