DIAMOND

Ventilador con motor DC. El cuerpo está fabricado en acero. Debido a que las palas son de ABS, es ideal para ambientes de alta humedad, pues evita las deformaciones. Permite tapar el foco de luz mediante accesorio incluido. Funciona con mando a distancia incluido.

Ceiling fan with DC motor. The body is made in Steel. Thanks to the ABS blades, it's ideal for high-humidity environments. This material avoids bending. An accessory included allows to cover the light focus. It works with remote control included on the box.

REF: **072247**
R 4539

INFO EXTRA

EXTRA INFO

TABLA DE RELACIÓN DEL ÍNDICE IP / DETAILS ON WHAT THE DIFFERENT IP NUMBERS MEAN

Primer dígito/Protección de objetos sólidos

- 0 Sin protección
- 1 Protegido de objetos sólidos con diámetro mayor que 50mm
- 2 Protegido de objetos sólidos con diámetro mayor que 12mm
- 3 Protegido de objetos sólidos con diámetro mayor que 2,5mm
- 4 Protegido de objetos sólidos con diámetro mayor que 1mm
- 5 Protegidos del polvo
- 6 A prueba de polvo

Segundo dígito/Protección de humedad

- 0 Sin protección
- 1 Protegido del goteo del agua
- 2 Protegido del goteo del agua inclinado más de 15°
- 3 Protegido del agua en spray
- 4 Protegido de salpicaduras de agua
- 5 Protegido de chorros de agua
- 6 Resistente al agua
- 7 Sumergible
- 8 Protegido de una sumersión continua

First digit/Protection from solid objects

- 0 No protection
- 1 Protection against solid objects with diameter greater than 50mm
- 2 Protection against solid objects with diameter greater than 12mm
- 3 Protection against solid objects with diameter greater than 2,5mm
- 4 Protection against solid objects with diameter greater than 1mm
- 5 Dust protected
- 6 Dust tight

Second digit/Protection from moisture

- 0 No protection
- 1 Protection from dripping water
- 2 Protection from dripping water when tilted upto 15 degrees
- 3 Protection from spraying water (rain)
- 4 Protection from splashing water
- 5 Protection from water jets
- 6 Protection from heavy seas
- 7 Protection from sumersion in water
- 8 Protection from continuous submersion in wate

INFO EXTRA

CURVAS FOTOMÉTRICAS / PHOTOMETRIC CURVES

Los productos Sulion han sido sometidos a ensayos fotométricos, y ponemos a disposición de nuestros clientes los archivos **ies** y/o **ldt** de nuestras luminarias.

Estos archivos pueden ser una excelente herramienta para crear proyectos lumínicos y suponer un incremento para las ventas.

The products Sulion have been submitted to photometric tests, and we leave to our clients the files **ies** and/or **ldt** of our lights.

These files can be an excellent tool to create light projects and to increase sales

- Plafón acrílico redondo o cuadrado con sensor microondas de movimiento y crepuscular. Incorpora tecnología SMD-LED de alta luminosidad y eficiencia. La nueva versión de esta luminaria incluye la posibilidad de graduar el alcance de la detección como el tiempo de encendido sin la función de detección.
- Área de detección: Posición 3 (2-3m) Posición 4: (3-4m) Posición 5: (4-6m).
- Tiempo de detección: Posición 2 ON: 15 segundos, OFF: 30 segundos.
- Aplicación: Zonas comunes, pasillos, etc.

- Round or square acrylic ceiling fixture with motion microwave sensor and twilight. Incorporates SMD-LED technology high brightness and efficiency. The new version of this fixture includes the possibility to scale the detection range and the ignition timing without detection.
- Sensing distance: Posición 3 (2-3m) Posición 4: (3-4m) Posición 5: (4-6m).
- Delaying time: Posición 2 ON: 15 seconds, OFF: 30 seconds.
- Application: Common areas, corridors, etc.

BATH

BAÑOS

BATHROOMS

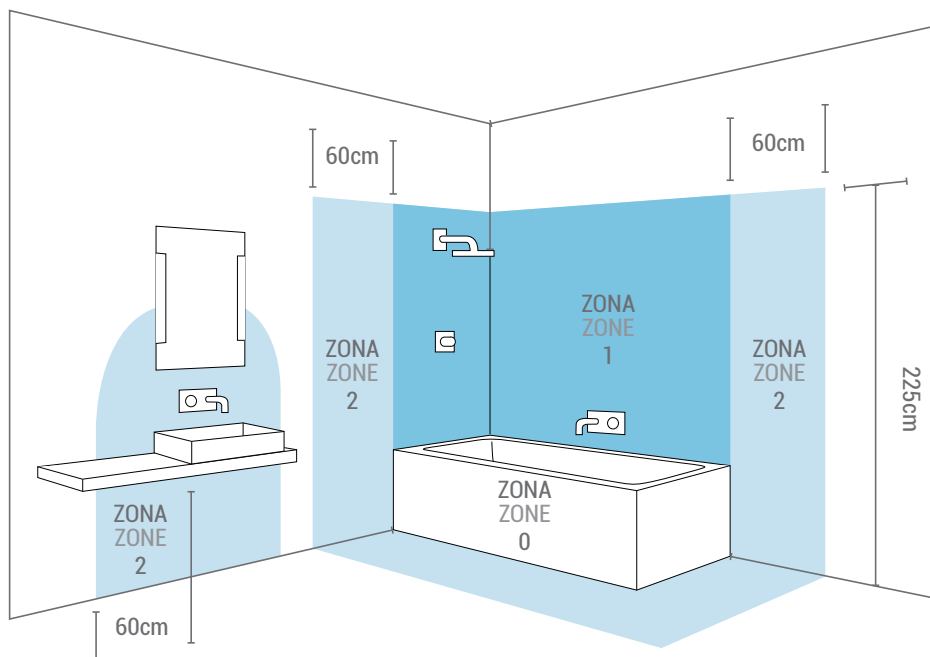

UNA ILUMINACIÓN SEGURA EN EL BAÑO / A SAFE LIGHTING IN THE BATHROOM

Con el propósito de una correcta instalación de los materiales eléctricos para una óptima iluminación, un baño está dividido en zonas. En función del nivel de IP, la zona donde puede ser instalado de forma segura, varía.

For the purposes of installing electrical equipment, a bathroom is divided into zones. The criteria for each zone is based on the risk of electric shock. The zones relate to the IP rating of products and where they can be safely installed.

INFO EXTRA
EXTRA INFO

BATH

Zonas de iluminación

Zona 0. El interior del lavabo, la ducha o bañera son zonas que van a contener agua, por lo que requieren productos eléctricos específicos para una sumersión continuada, de bajo voltaje (máx. 12V), y con un IPX7.

Zona 1. Es el área que está directamente sobre las zonas cero, con un límite de altura de 2,25m por encima del lavabo, ducha o bañera. Requerirán productos con un IPX4 o superior.

Se pueden usar aparatos con bajo voltaje de seguridad, pero el transformador deberá estar localizado a partir de la zona 3.

Zona 2. Es el área que continúa a la 1, se extiende 0,6m a lo ancho y 2,25m a lo alto. Necesitará productos con IPX4 o superiores. Se pueden usar aparatos con bajo voltaje de seguridad si el driver está instalado a partir de la zona 3.

Zona 3. Es el área contigua a la zona 2, y desde ésta se extiende 2,24m a lo ancho y 2,25m a lo alto. En esta zona se puede instalar cualquier equipo eléctrico, no se requiere ningún IP específico, sin embargo algunos productos no se recomiendan para instalar en el baño si no cuentan con ninguna protección IP.

Lighting zones

Zone 0. The interior of the bath or shower that can hold water. Requires electrical products to be low voltage (max 12V) and rated IPX7.

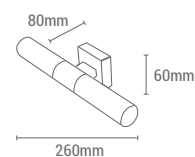

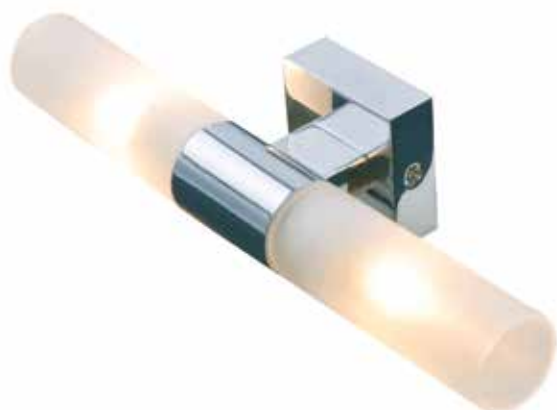

Zone 1. The area directly above zone 0 limited to a height of 2,25m above the bath or shower. Requires electrical products to have an IPX4 or better. Products using safety extra low voltage (SELV) can be used but the transformer must be located in zone 3 or beyond.

Zone 2. The area beyond zones 0 a 1, stretching 0,6m horizontally and up to 2,25m vertically, Also includes the recessed area of a window with a sill next to the bath. Requires electrical products to have an IPX4 or better. SELV with the transformer located in zone 3 or beyond.

Zone 3. The area beyond zone 2, stretching 2,4 horizontally and up to 2,25m vertically, used to be rated as zone 3 but this is now not separated and any lighting fitting can go in this area. There is not a specified IP number for this area, although some products are marked as not for bathroom use. SELV or shaver units are permitted, all other portable electrical equipment is not.

OUTDOOR

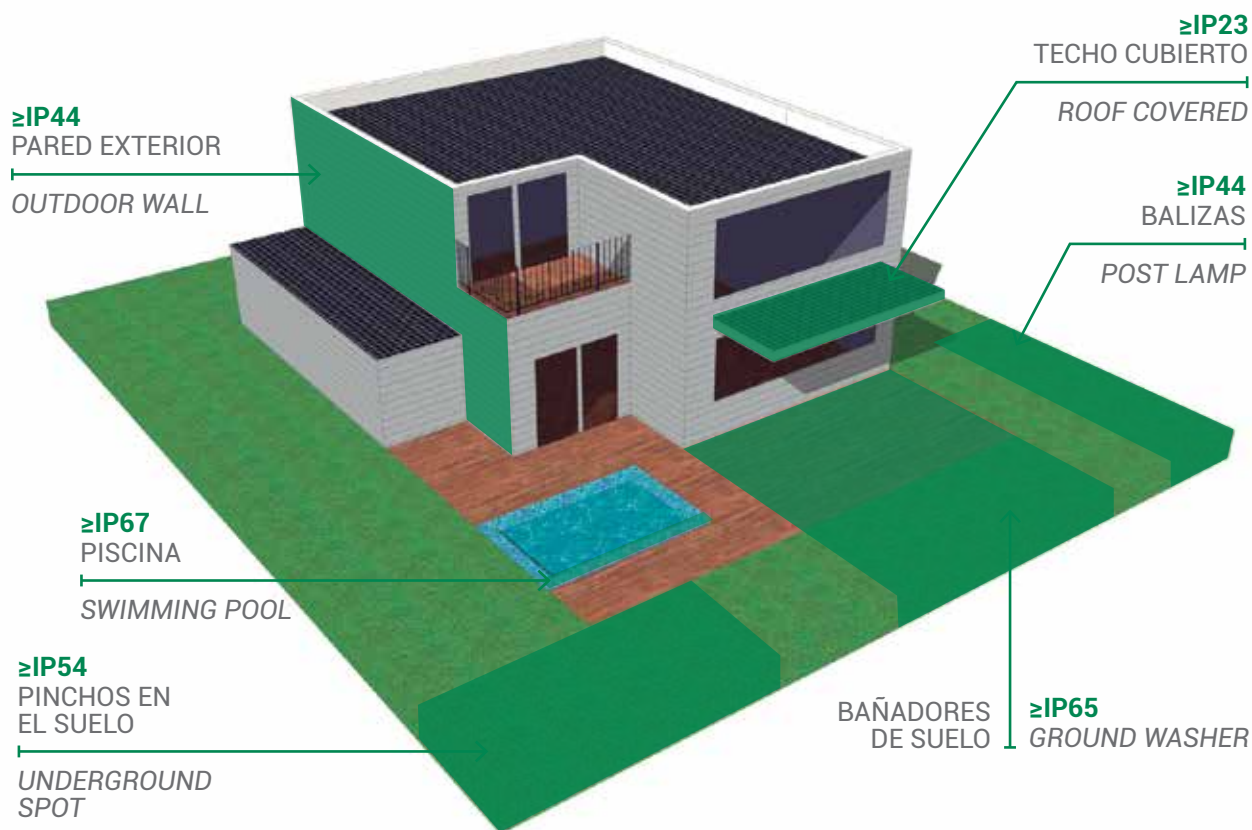

INFORMACIÓN IP / IP INFORMATION

Zonas de iluminación

Con el propósito de una correcta instalación de los materiales eléctricos para una óptima iluminación, el espacio exterior está dividido en zonas. En función del nivel de IP, la zona donde puede ser instalado de forma segura varía.

Lighting zones

For the purposes of installing electrical equipment, the outdoor space is divided into zones. The criteria for each zone is based on the risk of electrical shock. The zones relate to the IP rating of products and where they can be safely installed.

1 Drenaje

Recomendamos seguir las instrucciones de montaje de los empotrables en suelo.

- Es importante evitar colocar las luminarias en zonas de depresión del terreno y zonas donde se pueda acumular agua o permanentemente húmedas.
- Los productos químicos como los abonos pueden deteriorar los aparatos, recomendamos evitar el contacto de estos elementos con los productos.
- Prever una posible dilatación en superficies como el cemento.
- Colocar un drenaje eficaz para evitar el estancamiento de agua, como mínimo de 20 centímetros de grava por debajo de la carcasa de instalación. Un drenaje correcto debe absorber hasta 10 litros de agua en 15 minutos.
- Hacer funcionar la luminaria durante 20 minutos sin el cristal para evitar condensaciones de agua dentro al inicio del uso.

2 Materiales

Nuestros empotrables de suelo están fabricados en acero inoxidable AISI316. El bajo contenido en carbono de la aleación 316L otorga una mejor resistencia a la corrosión en estructuras soldadas. Uno de los beneficios del acero inoxidable AISI 316 respecto a otros materiales es que permite el uso de agua con cloro y de mar, ambientes de mar y suelos con un PH alto o alcalinos sin sufrir corrosión.

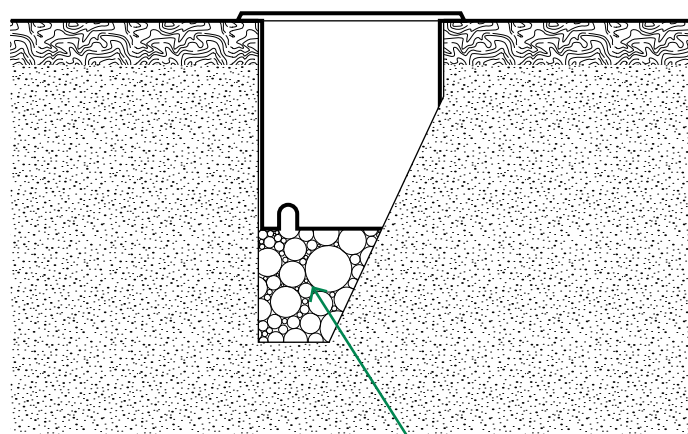

1 Drainage

It is essential to follow the instructions of the built-in luminaires in order to achieve the best performance.

- We recommend to avoid installation in terrain depression and areas where water can accumulate or permanently damp.
- Chemical products used to fertilise gardens could damage some of the luminaire components, so we recommend avoid the contact with these products.
- Anticipate a dilation coating for built-in luminaires installed on surfaces like cement or concrete, to avoid possible dilation or compression.
- Install an effective drainage system to avoid the accumulation of water, at least 20 cm of gravel under the installation casing. A correct drainage must absorb up to 10 litres of water in 15 minutes.
- Put the light on for 20 minutes without the glass to avoid condensation inside on first use.

2 Materials

Our soil downlights are made of stainless steel AISI316. The low content in carbon of the alloy 316L grants a better resistance to the corrosion in welded structures. One of the benefits of the stainless steel AISI 316 compared to other materials: It allows the water use with chlore and seawater, environments with high humidity and soils with a high PH or alkaline without suffering corrosion.

FAN

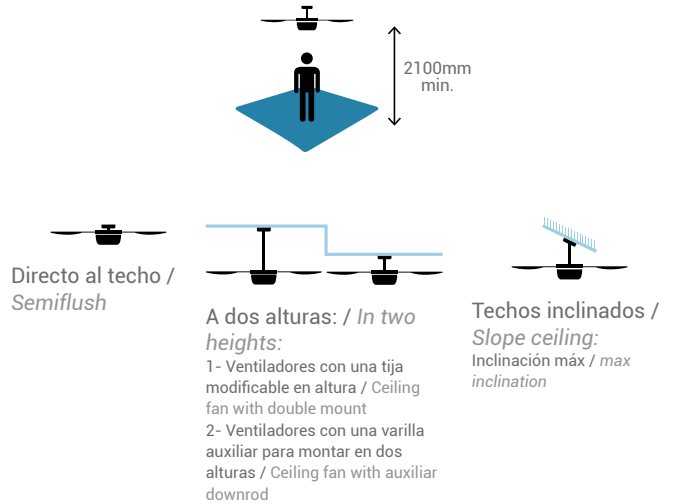

CÓMO ELEGIR SU VENTILADOR / HOW TO CHOOSE YOUR CEILING FAN

1 Superficie / Surface

En función del espacio disponible / Depending on the availability of space.

En función de la altura del techo / Depending on the roof height.

2 Fuente de luz / Light source

Sin luz / Without light

Con luz / With light

Con portalámparas tradicional / With traditional lamp holder

LED incorporado / Built in LED

3 Tipo de motor / Motor type

AC Corriente alterna / AC Alternating current

Tres velocidades / Three speeds

DC Corriente continua / DC Direct current

Ultrasilencioso / Ultraquiet
 Bajo consumo / Low consumption
 Seis velocidades / Six speeds
 Permite graduar de manera más precisa las revoluciones y el flujo de aire / Allow to adjust the RPM and airflow accurately

4 Palas / Blades

La cantidad de palas no influyen en la cantidad de aire, pero es importante tener en cuenta: / *The quantity of blades does not affect the airflow, but it's important to look out:*

• Inclinación / Angle

A mayor grados de inclinación de la pala, mayor flujo de aire / *When the angle of inclination is larger, the airflow is more abundant.*

• Material / Material

METAL

El metal es muy resistente y duradero, además mueve más aire / *The metal is stronger and more durable, in addition it moves more air.*

ABS

El ABS es un tipo de plástico, de mayor resistencia y con más aerodinámica / *The ABS is a more resistant plastic and more aerodynamic.*

ACRYLIC

El acrílico es ideal para zonas con mucha humedad, porque no se deforma / *No warping blades with humidity*

MADERA

Las palas de madera hacen menos ruido / *The timber-blade produce less noise*

MDF / PLYWOOD

El plywood es un material derivado de la madera con mayor resistencia que el MDF. Recomendamos este material para palas a partir de 105cm. / *Plywood is a product derived from Wood with more resistance than MDF, recommended for blades from 105cm.*

5 Mando a distancia o tirador con cadena / Remote control or chain

Cadena / Chain

Todos los modelos que no incluyen mando permiten la instalación mando a distancia (consultar código de artículo en cada caso) / *A remote control can be installed in all fans that don't include it (ask for remote control code in each case)*

Mando a distancia / Remote control

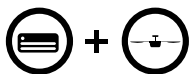

Cada modelo incluye su mando a distancia (indicado en catálogo) / *Each model includes its remote control (indicated in the catalogue)*

6 ¿Sustituye al aire acondicionado? / Substitute of air conditioning?

Alguna información importante: / *Important info:*

La temperatura ideal es 25°C. Por cada grado que bajamos el aire acondicionado aumentamos un 8% el coste / *The ideal temperature is 25°C. When you reduce one degree the air-conditioning thermostat, you increase the bill 8%*

Verano / Summer

Combinado aire acondicionado + ventilador / *Combined air conditioning and ceiling fan*

+40% ahorro / *+40% saving on power costs*

Lo ideal es mantener la temperatura de un ambiente en 25°. Combinando aire acondicionado más ventilador, podemos mantener el termostato a 25° y tener una sensación térmica de 20°, consiguiendo un ahorro de un 8% por cada grado, y un 40% en estos 5°. / *The ideal temperature is 25°C. With the air conditioning and the ceiling fan, we can maintain 25°, with a thermal sensation of 20°, saving an 8% per grade, and a 40% for 5°.*

Sólo ventilador / *Only ceiling fan*

+80% ahorro / *+80% saving on power costs*

Durante la noche, recomendamos el uso del ventilador / *By night, we recommend the use of ceiling fan*

Invierno / Winter

Combinado aire acondicionado + ventilador / *Combined air conditioning and ceiling fan*

+10% ahorro / *+10% saving on power costs*

Al cambiar el giro del ventilador, el aire cálido que se queda en las capas superiores de una estancia, es empujado hacia abajo / *Winter mode changes the blade direction to anti-clockwise, pushing warm air downward.*

El ventilador reduce hasta 5 grados la sensación térmica / *The fan reduces until 5°C the thermal comfort*
